

Introduction to Jazz

For Piano and Accordion

1/ *Blues Exercise 3* is intended for pianists and accordionists (standard bass or chromatic bass systems).

2/ Its goal is to practice right-hand swing rhythmic placement with a "walking bass" played by the left hand.

3/ There are 3 audio files (with 3 different tempos) plus a sheet music score.

4/ The audio file includes: a first blues chorus performed on piano or accordion, depending on your instrument, accompanied by drums, allowing you to listen and absorb the rhythm.

5/ You must then play along with the second chorus accompanied only by the drums

Exercise Blues 3
